

## TESTIMONIAL

We have been working with Firstcom Solutions Pte Ltd for past projects since 6 years back. We were satisfied with the past experience and have decided to engage them again for Project Management and consultancy for Web Development, Web Application (System) & online marketing solutions. We have been working with their Business Manager Michelle Lim throughout the entire development and have completed everything together in good order.

All our developments have been completed till date and Michelle also advised on the type of server & security software needed for my platform to run smoothly. With the new system in place, we have now discarded the use of manual writing and tracking of data; everything can be searched anytime, anywhere within clicks of buttons.

Since the completion of the web & system, whenever we face any issues, Michelle & her team responds promptly to our problems and solve it with for us. With the recommendation of online marketing solution, our ranking on Google search has improved and we are now on the 1<sup>st</sup> page already within a month of engagement.

All in all, we are happy with the deliverables and outcome of the services we have engaged so far and will recommend Michelle to provide consultancy and recommendations to our business partners as well.

Yours faithfully,

Adrian Koh

Business Operation Manager
