

Dear Firstcom Solutions ,

I am writing this letter to commend Jas for her performance in planning the marketing and media promotion for SenMao and recognize her contribution. Earlier this year, Jas from Firstcom Solution started to taking care of our marketing activities. We discussed and exchanged many electrons together, and she had her own unique opinions for every idea we had and put forward many more effective solutions. Many of her planning cases enable us to achieve the desired market effect more effectively. We also got new inspiration from her scheme and learned a lot from it.

She has a precise positioning and a deep understanding of the market and our brand. We increased the awareness of the company and the brand With her help. According to some effective marketing planning, we expanded the customer base. Because of her and my team's efforts, we have developed a lot of new areas.

After half a year, some of her ideas and new initiatives have injected more fresh energy into our brand. She is a positive, sunny person with positive thinking and keen business acumen. I give you full recognition and appreciation for your contributions. I hope you will continue to maintain your high standard in the coming days. I am delighted and honored to work with you. All the best.

Warm regards,

Allen Lei Wang 
COO & Global Development Director
